3. DETECTED GRAPH ANOMALIES & BEHAVIORAL CORRELATION

| Anomaly Pattern           | Severity | Topological Flow / Finding                                                                                                        | Latency / Latent Window  | Evidence Provenance       |
|---------------------------|----------|-----------------------------------------------------------------------------------------------------------------------------------|--------------------------|---------------------------|
| Device Hardware Collusion | HIGH     | Single hardware IMEI (200) used alternatively with 8111111111 and 8222222222 within 15 minutes of laundering transactions.        | Switch Latency: < 15m    | device_logs.json · Row #1 |
| IPDR Subnet Convergence   | HIGH     | Identical egress IP (192.168.50.10) recorded authorizing transactions across 8111111111 and 8222222222 endpoints under 4 minutes. | Session Window: < 4 mins | IPDR.csv · Row #1         |

4. FORENSIC DIRECTIVES & OBSERVATIONS

- **Immediate CrPC Section 91 Directives:** Expedite formal freeze on primary conduit node 8111111111 and downstream cash-out nexus.
- **Device Hardware Collusion:** Physical handset rotation detected. Single cellular transceiver alternating between multiple SIM accounts.
- **IPDR Subnet Convergence:** Centralized network egress originating from commercial proxy or coordinated terminal.
